## ABOUT ME

Dedicated and innovative MEAN Stack Developer with a solid academic background and hands-on experience in developing robust web applications. Eager to leverage technical skills and expertise to achieve excellence in a challenging environment

---

## TECHNICAL SKILL

**Languages & Frameworks:** Java, Spring Boot, Node.js, Express, Angular

**Web Technologies:** HTML5, CSS3, JavaScript, Bootstrap

**Databases:** MySQL, MongoDB, PostgreSQL

**Tools & Platforms:** Docker, Git/GitLab, Postman, JSON, API Gateway

**Other Skills:** Microservices, Continuous Integration, Sprint Planning, Responsive Web Design

---

## PROFESSIONAL EXPERIENCE

**MEAN Stack Developer | Drake Software Service**

**Mar 2023 - Present**

### Sports-related Project

- Overview: Developed an application for live streaming sports events with real-time tagging capabilities for coaches.
- Role and Responsibilities:
  - Designed and implemented a user-friendly interface, enhancing the user experience for coaches and team members.
  - Optimized API calls to handle real-time data with low latency.
  - Improved application scalability and deployment efficiency by utilizing Docker.
- Technologies Used: Angular, RESTful APIs, Docker

### Payroll Project

- Overview: Worked on a payroll application to streamline payroll processing for employees and HR departments.
- Role and Responsibilities:
  - Designed and implemented user interfaces and reusable components using Angular.
  - Integrated frontend functionalities with backend APIs to handle payroll data.
- Technologies Used: Angular, TypeScript, RxJS, HTML, CSS

### Repair Order Project

- Overview: Managed a project for tracking and managing repair orders for various devices.
- Role and Responsibilities:
  - Resolved bugs and created new updates for the application.
  - Developed new APIs and resolved issues in existing APIs using Node.js and Express.
  - Utilized Strapi for data management and storage.
  - Worked on the user interface using Angular to improve user experience, functionality and integrated frontend functionalities with backend APIs.
- Technologies Used: Angular, Node.js, Express, Strapi

---

## EDUCATION & CERTIFICATIONS

### Bachelor of Technology in Electrical Engineering

Aug 2019 - July 2022

Graphic Era Deemed to be University, Dehradun  
CGPA: 8.07

### Diploma in Electrical Engineering

2016 -2019

Government Polytechnic Uttarkashi  
Percentage: 71%

### Web Designing Certification

Feb 2022 - Jul 2022

### Full Stack Software Engineer Training @Stackroute, NIIT

Jul 2022 - Feb 2023

---

## PERSONAL PROJECTS

### Natours Application (Backend Application)

Built using modern **technologies**: node.js, express.js, mongoDB

### Examify - Online Exam Portal

Developed a web application for online exam management, implemented user registration, authentication, profile management, and responsive design with light/dark modes.

**Technologies:** Angular, Spring Boot, MySQL, JWT, Git
